New Zealand Department of Agriculture.

THE NEW ZEALAND JOURNAL OF AGRICULTURE.

VOL. 48.

(JANUARY - JUNE, 1934.)

Published by direction of
The Hon. C. E. MACMILLAN, Minister of Agriculture.

WELLINGTON.

BY AUTHORITY: G. H. LONEY, GOVERNMENT PRINTER.

1934.

THE NEW ZEALAND

JOURNAL OF AGRICULTURE.

VOLUME 48.

(January - June, 1934.)

INDEX.

A.

Abortion, contagious, treatment, 192.
Adamson, N. J.—Russet on apples, 300.
Agricultural clubs, boys' and girls', 30.
Agricultural legislation (1933), 107.
Allan, H. H.—Notes on recently observed exotic weeds, 42, 295.
Analysis of liming materials, 357.
Answers to inquiries, 64, 191, 256, 320, 384.
Aphis on cabbage family, 256.
Apiary, the (monthly notes), 57, 121, 184, 249, 313, 378.
Apples, russet on, 300.
Apples, the method of preparing and packing for export, 87.
Apples-trees, effect on, of lime-sulphur following bordeaux mixture, 15.
Army worm, the New Zealand, 205.
Artificial fertilizers carried by rail, 368.
Aston, B. C.—
Pampas-grass as winter cow-feed, 285.
The misuse of lime on bush-sick lands, 357.
What is limonite, 110.
Aston, B. C., and Bruce, J. A.—The chemistry of weed-killers, 172.

B.

Barley diseases, the control of, 235.
Barley, feeding to poultry, 256.
Barry, W. C.—Appointment as Director, Live-stock Division, 48.
Bates, E. M.—See Hudson, A. W., and Bates, E. M.
Blackberry, cropping to control, 106.
Brien, R. M.—The fungi causing rots of stored apples in New Zealand, 143.
Brown, F. C.—Poultry-keeping (monthly notes), 55, 119, 311, 375.
Bruce, J. A.—
Registration of fertilizers in 1932–33, 37.
See Aston, B. C., and Bruce, J. A.
Buffalo burr, 295.
Bush-sick land, the misuse of lime on, 357.

C.

Cabbage family, aphis on, 256.
Calder, R. A.—See Hadfield, J. W., and Calder, R. A.
Celery-spot disease, control of, 300.
Cereal diseases, experiments on control of some, by seed-dusting, 234.
"Ceresan new" seed dust, field trials with, 269.
Certification of seed potatoes, 358.
Chamberlain, E. E.—Tomato mosaic, 344.
Chemical fertilizers and superphosphates, 356.
Chemistry of weed-killers, the, 172.
Citrus-culture (monthly notes), 55, 118, 181, 247, 310, 375.
Cockayne, A. H.—A review of grass farming in New Zealand, 65.

Connell, R. P.—
Boys' and girls' agricultural clubs, 30.
See McCulloch, W. J., and Connell, R. P.
The farm (monthly notes), 49, 113, 176, 241, 305, 369.
Contamination of milk through teat-canals, 330.
Control of celery-spot disease, 300.
Control of fleas, the, 343.
Cow-feed, winter, pampas-grass as, 285.
Cunningham, G. H.—
Effect on apple-trees of lime sulphur following bordeaux mixture, 15.
Orchard sprays in New Zealand, 1.
Cussen, C. — Poultry-keeping (monthly notes), 182, 247.
Cyaniding, methods of, in glasshouses, 47.

D.

Dairy farms, the returns from pig-fattening on, 75.
Dairy herd, management and feeding of, during the winter months, 291.
Dairying industry, statistical information relating to, 271.
Deem, J. W., retirement of, 175.
Disease, pig-management and its relation to, 352.
Disinfectant dusts, effect of excess of, on germination of wheat, 174.
Distemper, treatment for, in dog, 64.
Diversification as a means of making dairying safer and more profitable, 277.
Dominion Meteorological Office—
Weather records, 62, 127, 189, 254, 318, 382.
Douglas, A. T.—The method of preparing and packing apples and pears for export, 87.
Drugs in treatment of stomach-worm in calves, 384.
Dry, F. W.—Hairy fibres of the Romney sheep, 331.

E.

Earp, E. A.—The apiary (monthly notes), 57, 121, 184, 249, 313, 378.
Experiments—
Effect of width of plots on yield determination, 90.
On control of some cereal diseases by seed-dusting, 234.
Potato-manuring in South Island, 24.
Wheat-manuring in the South Island, 321.
External trade, improvement in, 240.

F.

Farm production, 1932–33, 208.
Farm, the (monthly notes), 49, 113, 176, 241, 305, 369.
Feeding barley to poultry, 256.
Feeding of ewes, the relation between, and the susceptibility of their lambs to pulpy kidney, 197.
Feeding of lupins to sheep, 320.
Fertilizer importations (quarterly), 208.
Fertilizers—
Artificial, carried by rail, 368.
Chemical, and superphosphates, 356.
Registration of, in 1932–33, 37.
Fertilizing influence of legumes, 320.
Fields Division—
Potato-manuring experiments in South Island, 24.
Wheat-manuring experiments in the South Island, 321.
Field trials with "Ceresan new" seed dust, 269.
Flay, A. H.—Lamb-fattening with wheat, 12.
Fleas, the control of, 343.
Foot-rot race, concrete, 191.
Foy, N. R.—Statistics of the New Zealand seed trade, 1925–33, 237.

G.

Glasshouses, methods of cyaniding in, 47.
Golf-greens, sowing down, 126.
Goose-grass in young pasture, 64.
Grading "grain" in honey, 226.
Grass farming in New Zealand, a review of, 65.
Grassland, area of, top-dressed in 1932–33, 175.

H.

Hadfield, J. W., and Calder, R. A.—The oat varieties of New Zealand, 257.
Hairy fibres of the Romney sheep, 331.
Hilgendorf, F. W.—Irrigation in Canterbury, 231.
Honey, grading "grain" in, 224.
Hooper, R. H., retirement of, as editor, 112.
Hopkirk, C. S. M.—
Pink-eye in sheep, 224.
Some parasites of our domestic livestock, 102.
Horse nettle, 295.
Horticulture Division — Control of orchard diseases and pests by spraying, 209.
Horticulture (monthly notes), 59, 123, 185, 250, 314, 378.

Hudson, A. W.—
Investigations in pasture production, 17.
Pasture management: Good "control" of pastures is not necessarily good "management," 302.
Hudson, A. W., and Bates, E. M.—Potato-manuring experiments: Effect of width of plots on yield determination, 90.
Hyde, W. C. — Horticulture (monthly notes), 59, 123, 185, 250, 314, 378.

I.

Inquiries, answers to, 64, 191, 256.
Insemination, mass artificial, 192.
Inventions of agricultural interest, 106, 161, 284, 365.
Investigations in pasture production, 17.
Irrigation in Canterbury, 231.

J.

James, R. L.—Irrigation in Canterbury, 231.

L.

Lamb-fattening with wheat, 12.
Lawn, treatment of weedy, 384.
Legumes, fertilizing influence of, 320.
Leslie, A.—The relation between faulty winter feeding of ewes and the susceptibility of their lambs to pulpy kidney, 197.
Levy, E. B.—Some observations on certified perennial rye-grass in Canterbury, Otago, and Southland, 129.
Lime, misuse of, on bush-sick lands, 357.
Lime-sulphur following bordeaux mixture, effect on apple-trees, 15.
Liming materials, analysis of, 357.
Limonite, what is? Explanation and warning, 110.
Live-stock, some parasites of our domestic, 102.
Live-stock Division—
Appointment of Director of, 48.
Production of clean milk, 366.
Lupins, feeding of, to sheep, 320.

M.

McCulloch, W. J., and Connell, R. P.—Diversification as a means of making dairying safer and more profitable, 277.
McCulloch, W. J., and Smith, J. M.—Some Taranaki pastures improved by top-dressing with potash, 229.
McIlwaine, J. E.—
Management and feeding of the dairy herd during the winter months, 291.
Measures against internal parasites, 116.
McMeekan, C. P. — See Riddet and McMeekan.
Management and feeding of the dairy herd during the winter months, 291.
Manuring—
Potato, experiments in South Island, 24.
Wheat, experiments in South Island, 321.
Marshall, D.—Pig-management and its relation to disease, 352.
Meteorological Office—Weather records, 62, 127, 189, 254, 318, 382.
Milk—
Clean, production of, 366.
Contamination of, through teat-canals, 330.
Misuse of lime on bush-sick lands, the, 357.
Morrison, A. E.—Agricultural legislation of 1933, 107.
Mosaic, tomato, 344.
Mould fungi, the control of, in dairy factories and meat-works, 70.
Muggeridge, J.—
Methods of cyaniding in glasshouses, 47.
The New Zealand army worm, 205.

N.

Neill, J. C.—
Control of celery-spot disease, 300.
Control of mould fungi in dairy factories and meat-works, 70.
Control of stinking smut of wheat, 170.
Effect of excess of disinfectant dusts on germination of seed wheat, 174.
Experiments on control of some cereal diseases by seed-dusting, 234.
Field trials with "Ceresan new" seed-dust, 269.
Notes on recently observed exotic weeds, 42, 295.

O.

Oat-smut, the control of, 234.
Oat varieties, the, of New Zealand, 257.
Orchard diseases and pests, control of, by spraying, 209.
Orchard sprays in New Zealand, 1.
Orchard, the (monthly notes), 53, 117, 180, 245, 309, 373.

P.

Pampas-grass as winter cow-feed, 285.
Parasites—
Some, of our domestic live-stock, 102.
Measures against internal, 116.
Pasture management: Good "control of pastures is not necessarily good "management," 302.
Pasture production, investigations in, 17.
Pasture top-dressing in Otago and Southland, 97.
Pastures, some Taranaki, improved by top-dressing with potash, 229.
Paynter, L.—Citrus culture (monthly notes), 55, 118, 181, 247, 310, 375.
Pears, the method of preparing and packing, for export, 87.
Pig-fattening, returns from, on dairy farms, 75.
Pig industry and feed-supplies, 217.
Pig management and its relation to disease, 352.
Pigs, dietetic trouble in, 64.
Pigs, rupture in, 256.
Pink-eye in sheep, 224.
Plots, width of, effect of, on yield determination, 90.
Potash, some Taranaki pastures improved by top-dressing with, 229.
Potatoes, certification of seed, 358.
Potato-manuring experiments, effect of width of plots on yield determination, 90.
Potato-manuring in South Island, 24.
Potentialities in fat-lamb production on portion of some dairy farms, 277.
Poultry, feeding barley to, 256.
Poultry-keeping (monthly notes), 55, 119, 182, 247, 311, 375.
Production of clean milk, 366.
Pulpy kidney, the susceptibility of lambs to, and the relation between faulty winter feeding of ewes, 197.

R.

Reid, W. D., and Robinson, D. S.—Grading "grain" in honey, 226.
Riddet, W., and McMeekan, C. P.—Returns from pig-fattening on dairy farms, 75.
Romney sheep, hairy fibres of, 331.
Rots of stored apples in New Zealand, the fungi causing, 143.
Rudall, K. M.—Pulling out wool-fibres and its effect on hairiness, 162.
Rupture in pigs, 256.
Russet on apples, 300.
Rye-grass, certified perennial, in Canterbury, Otago, and Southland, some observations on, 129.

S.

Scott, M. J.—The pig industry and feed-supplies, 217.
Seasonal notes, 49, 113, 176, 241, 305, 369.
Seed dust—
"Ceresan new," field trials with, 269.
Disinfectant, effect of, on germination of seed wheat, 170.
Seed potatoes, certification of, 358.
Seed trade, statistics of the New Zealand, 237.
"Seedy toe," treating horses for, 191.
Sheep, pink-eye in, 224.
Silage, use of, 191.
Singleton, W. M.—Testing of purebred dairy cows; review of results in 1933, 149.
Smith, J. M.—See McCulloch, W. J., and Smith, J. M.
Statistical information relating to the dairying industry, 271.
Statistics of the New Zealand seed trade, 1925–33, 237.
Stinking-smut, control of, of wheat, 170.
Stomach-worm in calves, drugs in treatment of, 384.
Stuart, A.—
See Tennent, R. B., and Stuart, A.
Winton Experimental and Demonstration Farm, 193.
Subterranean clover, limited use for, 351.
Superphosphates and chemical fertilizers, 356.

T.

Tennent, R. B. and Stuart, A.—Pasture top-dressing in Otago and Southland, 97.
Testing of purebred dairy cows in 1933, 149.
The oat varieties of New Zealand, 257.
Thistle, saffron, marsh, 42.
Top-dressing, pasture, in Otago and Southland, 97.
Top-dressing with potash, some Taranaki pastures improved by, 229.
Trade—
External, improvement in, 240.
Seed, of New Zealand, statistics, 1925–33, 237.
Treatment of stomach-worm in calves, 384.
Treatment of weedy lawn, 384.

V.

Vision, relative, 191.

W.

Weather records (monthly), 62, 127, 189, 254, 318, 382.
Weed-killers, the chemistry of, 172.
Weeds, exotic, notes on recently observed, 42, 295.
Weedy lawn, treatment of, 384.
Wheat, control of stinking-smut of, 170.
Wheat, effect of excess of disinfectant dusts on germination of, 174.
Wheat, lamb-fattening with, 12
Wheat - manuring experiments in the South Island, 321.
Whelan, J. W.—The orchard, 53, 117, 180, 245, 309, 373.
White-fly, economical control of, 47.
Wild onion, 42.
Wild shamrock, control of, 320.
Winton Experimental and Demonstration Farm, 193.
Wool fibres, pulling out, and its effect on hairiness, 162.
